Lindy Colombini Presents Glaciers & the Shaping of Michigan's Landscapes

Live @ the Library, a series of events including author visits and informational presentations at Fremont Area District Library is thrilled to host Lindy Colombini for a presentation about glaciers and the shaping of Michigan's landscapes.

Geologist Lindy Colombini will discuss the formation of continental glaciers and the different landscape features they create, relating these features to Michigan and ultimately showing how the Great Lakes were formed and why we have lakes, farmland, AND woodland. Lindy earned her Bachelor of Science in Geology at Central Michigan University and Master's Degree at Vanderbilt University, focusing on the geochemistry of ancient volcanic rocks. This event will take place in the Fremont library's Community Room on Tuesday, September 26th at 7:00 p.m.
